

Security Innovation has been recognized as a leader in the Gartner Magic Quadrant for General Security Awareness Computer-Based Training for the second year in a row!

GENERAL AWARENESS TRAINING PROGRAM

Our highly interactive scenario-based modules equip general staff to recognize the value of different types of information; to understand the scope, nature and origin of the diverse risks to such information; and to behave proactively to protect this information in their everyday work. Our modules include:

MALWARE AWARENESS

In this module, learners will understand the goals of malware, identify the many types of malware, and recognize how to prevent malware infection both at work and at home.

EMAIL SECURITY

Staff will learn to recognize malicious email before it becomes a threat, how to properly handle email, and best practices around how and when to use email to send specific types of information.

PHISHING AWARENESS

Through this module, staff will recognize a malicious email before it can become a threat, understand the various ways in which attackers try to trick and entice users, and best practices to properly handle and avoid phishing attacks.

MOBILE DEVICE SECURITY

In this module, staff will learn about mobile devices, the ways data can be leaked or lost, and the challenges that arise when the line between what is corporate and personal is blurred. We will look at mobile security from a number of platforms.

PCI COMPLIANCE

Through participating in this course, employees will be able to recognize appropriate protection mechanisms for cardholder data and acknowledge how to the PCI DSS helps minimize risk to cardholder data.

PASSWORD SECURITY

Staff will recognize the risks surrounding password security, identify safeguards used to protect passwords, and techniques used by attackers to obtain passwords. In an interactive exercise, users will learn how to create and remember strong passwords, better securing corporate accounts.

PHYSICAL SECURITY

This module teaches staff best practices for minimizing breaches and the ability to identify different types of data that may be exposed via hardware theft. Employees will learn the risks associated with transporting sensitive data and the importance of maintaining personal security when traveling.

continued...

SOCIAL ENGINEERING

In this module, employees will identify the many forms of social engineering and its potential impacts, identify techniques used by social engineers and understand how to establish validity of requests in order to perform daily business functions in light of the threat of social engineers.

TRAVEL SECURITY

With the amount of data we can carry around in minuscule devices, travel security is more important than ever. This module introduces staff to the risks associated with transporting sensitive data, offers guidance around how to travel safely with sensitive information and when to leave it at home.

SUPPLEMENTAL MATERIALS

Each module combines instruction with a suite of complementary communications materials, designed to enhance the learning process, including:

TIP SHEETS & GUIDES

Tied to that month's training module, the tip sheet is a tangible tool that breaks down a larger concept into short, easy steps. These are meant to be printed and distributed at a weekly team meeting, or by individuals, and put on display at each workstation.

INTERACTIVE CHALLENGES

Each course combines learning theory and subject matter expertise to deliver a course that is informative and compelling. This content is paired with an interactive exercise that is challenging and engaging.

INFOGRAPHICS

Putting a graphical and artistic spin on the learning objectives, these high-impact posters are attention-grabbing and excellent for visual learners, data junkies and the casual observer.

CUSTOMIZABLE ARTICLES

Short, informative pieces that engage the employee with information related to the module's theme and content. These can be customized in a variety of ways.

2 MINUTE VIDEOS

Our video series offers practical, memorable tips for DOs an DON'Ts around all of our security awareness topics. Using humor, simple design and brevity, these videos are a great supplement to our training program.
